Projects

Personal Portfolio Website – [Demo](#)

June 2023 - June 2023

- Developed a personalized portfolio website using **JavaScript, HTML, CSS, and ReactJS** to showcase skills, projects, and contact information
- Implemented **responsive design** principles to create an aesthetically pleasing and user-friendly interface that adapts seamlessly to different devices
- Integrated **EmailJS API** to facilitate client-side email sending directly from the application

To-Do List App – [Demo](#)

August 2023 - August 2023

- Created an interactive To-Do List web application utilizing **HTML, CSS, and JavaScript** to help users manage tasks effectively
- Employed **Git** for version control throughout the development process
- Incorporated features for adding and removing tasks, enhancing overall user productivity

Experience

Puzukan Tan Korean BBQ – Falls Church, VA.

Oct 2022 – May 2023

Server

- Managed high volume sections** as a server, providing exceptional table service to several different groups of customers while quickly and carefully grilling various cuts of meat
- Frequently **communicated** with kitchen staff as well as collaborated with a team of **6-8** servers to ensure smooth dining operations and satisfactory customer experiences
- Utilized **strong interpersonal skills**, actively engaging with guests to foster a memorable and enjoyable dining atmosphere, resulting in increased customer retention rate
