---

As a driven computer science student with a strong passion for programming, I'm eager to launch a career in the tech industry as a Software Engineer. I am seeking a challenging entry-level position where my creative thinking and problem-solving skills can be utilized to make meaningful contributions as a valued team member. Ultimately, my goal is to advance the success of the organization by delivering exceptional full-stack solutions that seamlessly connect front-end and back-end technologies while enhancing user experiences.

## Education

---

### Associate of Science, Engineering GPA: 3.729

Graduated: May 2023

Northern Virginia Community College – Annandale, VA.

*Relevant Coursework:* Data Structures & Algorithms, Object Oriented Programming.

*Activities and Awards:* Member of Coding Club, Dean's List, Presidential Scholars.

### Bachelor of Science, Computer Science
